Jeziki/ Languages:	Predavanja/Lectures: slovenski/Slovenian
	Vaje/Tutorial: slovenski/Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:	Prerequisites:
<ul style="list-style-type: none"> • Vpis v drugi ali tretji letnik študijskega programa. • Študent mora pred izpitom pripraviti in predstaviti seminarsko nalogu. 	<ul style="list-style-type: none"> • A prerequisite for inclusion is enrolment in the second or the third year of study. • Students have to successfully prepare and present a seminar paper before the examination.

Vsebina:	Content (Syllabus outline):
<ul style="list-style-type: none"> • <i>Uvod</i> (kras, naravni viri, zgodovina, osnove krasoslovja). • <i>Ranljivost krasa</i> (vzroki, pritiski, problemi). • <i>Raba kraških naravnih virov</i> (voda, kamnine, habitati ipd.). • <i>Varovanje krasa</i> (zakonodaja, pomanjkljivosti varovanja, alternativni pristopi). • <i>Trajnostno upravljanje</i> (seznanitev s sodobnimi raziskovalnimi 	<ul style="list-style-type: none"> • <i>Introduction</i> (karst, natural resources, history, basics of karstology). • <i>Karst vulnerability</i> (causes, pressures, problems). • <i>Use of karst natural resources</i> (water, rocks, habitats, etc.). • <i>Karst protection</i> (legislation, shortcomings of current protection status, alternative approaches). • <i>Sustainable management</i> (familiarization with modern research

tehnologijami in možnimi rešitvami za izpostavljenе probleme).	technologies and possible solutions to the problems identified).

Cilji in kompetence:

Učna enota prispeva predvsem k razvoju naslednjih splošnih in specifičnih kompetenc:

- spoznavanje značilnosti in razpoznanjenost kraškega sveta,
- spoznavanje kraških naravnih virov in njihovo ranljivost,
- evidentiranje in definiranje naravnih potencialov krasa in njihovo rabo ter načinov trajnostne izrabe,
- poznavanje načinov varovanja na osnovi strateških dokumentov in primere dobrih praks iz tega področja,
- uporaba znanstvenih metod pri reševanju strokovnih problemov,
- uporabo pridobljenega znanja v praksi.

Objectives and competences:

The learning unit mainly contributes to the development of the following general and specific competences:

- getting to know the characteristics and the extent of karst areas,
- getting to know karst natural resources and their vulnerability,
- recording and defining the natural potentials of the karst, their use and ways of sustainable use,
- knowledge of protection policies based on strategic documents and knowledge of examples of good practices in this field,
- use of scientific methods in solving professional problems,
- use of acquired knowledge in practice.

Predvideni študijski rezultati: Študent/študentka: <ul style="list-style-type: none"> • opiše pojme naravni vir, geopotencial, kras, naravno bogastvo, raba, trajnostna raba, • pojasni tipologijo in vrste naravnih virov na krasu, ter razprostranjenost krasa v svetu in v Sloveniji, • prepozna ranljivost krasa ter načine za trajnostno izrabo kraških naravnih virov, • napiše samostojno raziskovalno delo, • kritično presoja o primernosti zakonodajnih ukrepov na področju varovanja okolja. 	Intended learning outcomes: Students: <ul style="list-style-type: none"> • describe the terms natural resource, geopotential, karst, use, sustainable use, • explain the typology of natural resources in karst, and the distribution of karst in the world and in Slovenia, • recognize karst vulnerability and ways to use karst natural resources sustainably, • write independent research work, • critically assess the appropriateness of legislative measures in the field of environmental protection.
